SANITARY
FITTINGS AND
ACCESSORIES

Pictograms and function markings

Eco+
Products with this sign use less water and energy compared to standard models.

FERRO AirMix
The faucet aerator with additional water aeration system. It allows you to use less water while maintaining the comfort of a rich stream.

Ferro Eco Save
Ferro Eco Save limiter allow water savings of up to 50%. Installed in shower mixers they reduce the water flow.

FerroClick
Hot water control system and full open flow control system.

Thermostatic mixer
The hot water lock protects against scalding and ensures a constant water temperature of 38°C.

KITCHEN FITTINGS

Pull-out spout
The spout with pull-out hose increases the comfort of filling high vessels and allows for precise washing and rinsing.

Rotational spout
The spout rotates 360 degrees.

Two spouts
A product with two independently controlled spouts.

Shower / Spray
A mixer with the ability to switch between two types of spray.

Flexible spout
The spout can be freely controlled to precisely direct the jet when rinsing or filling dishes.

Foldable spout
A faucet designed to be mounted in front of a window; this foldable spout allows you to open the window.

Cold Start
This function allows you to run cold water in one movement, thus saving energy and increasing your comfort, whenever you want to quickly fill a vessel with cold water.

Reversible sink
The sink can be installed so that, depending on the needs, the drainer is on the left or right side.

Cork plug in the set
Cork plug complete with sink.

NOVELTIES

CAMIRO INOX

A warm side to an industrial kitchen

Stainless steel sink mixers are another unique proposition for modern interior design. The calm, dark finish of brushed steel perfectly matches the sinks from the Ferro offer, and will be the basis for industrial, simple kitchens.

BCQ4 Camiro Inox standing sink mixer

Welcome to the world FERRO GROUP

The FERRO Group is one of the largest manufacturers of sanitary and plumbing fixtures in Central and Eastern Europe with nearly 30 years of experience in the industry. Thanks to its commitment to high product quality and its mission to meet customer needs for a safe and well-functioning home, Ferro products are present in millions of places. Every year we introduce new products to the market, which ever better meet the expectations of even the most demanding customers.

The vision, mission and values set the direction in which we are going, inspire us in our daily work, define our way of functioning and approach to customers, employees, business partners and shareholders.

A good understanding of individual markets and their needs has enabled us to gain the trust of our customers and dynamic international expansion. Consistent investment in modern technologies based on the philosophy of sustainable development makes us offer attractive design and quality products for many market segments. As Ferro Group, we desire to develop a leading position in the field of bathroom and kitchen solutions and offer professional installation systems. We want to accompany our customers at every stage of contact with the product - from inspiration, through efficient delivery, to failure-free use.

The FERRO Group maintains its position as market leader thanks to its numerous advantages and market advantages.

Stable and secure position of the company

The Group owns several product brands, including Ferro, Metalia and Titania, which gives it a significant competitive advantage and ensures a strong market position. FERRO cares about maintaining standards of operation and continuous development of the range of high quality products, which allows to maintain a wide range of customers, increase confidence in the brand and maintain a stable market position.

Large-scale operations

In addition to its activities in Poland, the FERRO Group offers its products in Europe and on numerous foreign markets, becoming one of the largest manufacturers of sanitary and plumbing fixtures in Central and Eastern Europe. Our products are produced at the Czech factory NOVASERVIS in Znojmo as well as several other factories in Europe and Asia.

High quality of products

The FERRO Group is constantly striving to achieve the best possible quality parameters. FERRO places particular emphasis on meeting the requirements of the applicable standards, maintaining high technical parameters, safety and functionality of its products. This is emphasized by the fact that the FERRO Group has implemented the ISO 9001:2008 Quality Management System. Thanks to special attention to quality, our company has been repeatedly awarded and honoured for the high quality of products by the environment and industry institutions and reputable industry magazines.

Exceptional team

Our company and its success is made up of People, considered to be the most valuable asset of the Group. FERRO's organizational culture is created by people with passion and open-mindedness, which is why we employ exceptional employees and ensure their continuous development.

Ferro Group's activities on the European market are performed by local distribution companies and local sales force

Thanks to this, the company perfectly recognizes the needs of the market and adapts its activities to the local specifics. The flexibility and local activity, combined with the global opportunities offered by the Group, make Ferro Group today the leader in the sanitary and heating technology sector in Europe. Consistent implementation of the vision of international development results in an increasing expansion of Ferro Group into new markets.

FERRO headquarters in Skawina

The history of the FERRO Group since its foundation is connected with the south of Kraków, for many years the company's headquarters have been located in Skawina, a town near Kraków. The strength of the Ferro brand is the excellent quality of the products manufactured in the Czech factory on the basis of the European standards of technology and work organization, as well as the constantly updated and extended assortment comprising several thousand unique products offered in 25 categories: from bathroom and kitchen mixers and sinks, to water and measurement fittings, radiators, pumps and heating controls, and from 2021 also gas boilers, provided to both individual customers and institutional recipients - developers, property managers, tenants.

Production plant and logistics centre in Znojmo (Czech Republic)

Our brands

We listen to the needs of our customers and create for them high quality products under brands: **Ferro, Nobless, Metalia and Titania**. Each brand responds to the needs of different groups of customers, and all of them have been created to facilitate everyday life and guarantee safe, comfortable and functional interiors of every house.

Design and ergonomics

FERRO products are characterized by high quality, innovation and perfect design. This is evidenced by numerous awards and distinctions awarded by industry circles and prestigious interior design magazines. Our products are part of everyday life, accompany our customers, and contribute to their well-being and comfort of life. By providing heating and sanitary solutions, we care about the safety of use, functionality and comfort of the customer, his satisfaction is the only true measure of success.

Among the wide range of FERRO products, we can find real gems of design, which are appreciated during competitions and industry plebiscites.

Details are what matters

At every stage of production, FERRO attaches great importance to details, both in terms of their perfect execution and finish. Thanks to this, every product of the company is characterized by the highest quality and impeccable appearance. We strive to ensure that our products are in line with European trends, while guaranteeing quality and durability highly appreciated by our customers.

Safety and quality are our priorities, which is why we care about the certification of products and processes in certification bodies valued in Europe. All mixers are safe to use and have the approvals of the Polish hygiene facility.

QUALITY UNDER SCRUTINY

FERRO takes care of the excellent quality of its products. The company puts particular emphasis on meeting the requirements of the applicable standards, maintaining high technical parameters, safety and functionality of products. All the company's products are subject to extremely accurate and restrictive quality verification procedures. They are inspected at every production stand. The correct course of quality control processes is supervised by highly qualified engineers responsible for quality and product certification. The auditors check compliance with the procedures of the quality assurance system. These include the procedures specified by Polish PN and European PN-EN series standards and the procedures related to the Quality Management System.

Production process

FERRO's production is carried out in several modern factories around the world based on the highest quality raw materials and components from reliable suppliers from Europe and Asia.

We have our own production plant in Znojmo (Czech Republic) with a modern logistics centre. This, combined with our location in the heart of Europe, ensures efficient and effective distribution between the Group companies and to the various European and global markets. Before leaving the factories, all products undergo a meticulous quality control, which ensures that our customers receive a proven, reliable product that provides many years of comfortable operation.

The factory in Znojmo has a modern CNC machining plant, its own glassworks, assembly line, electroplating line, as well as faucet folding and polishing stations. The plant has almost 40 years of production tradition. Today not only faucets are manufactured there, but also bathroom accessories, bathroom fittings and brass distributors. The plant also boasts a fully automated chrome-plating plant with closed water circulation, adapted to the latest environmental requirements.

Experience and passion

Our company and its success is created by people who constitute the most valuable asset of the Group. FERRO's organizational culture is created by people with passion and open-mindedness, which is why we employ exceptional employees and ensure their continuous development. We believe that an appropriate incentive system, good working conditions and team partnership help to work effectively, develop employees and influence the further development of the company. In our daily activities we are guided by values that allow us to build an extraordinary working atmosphere.

WE WORK WITH
EXTRAORDINARY PEOPLE
BECAUSE IT IS THANKS TO
THEM THAT WE ACHIEVE
EXTRAORDINARY RESULTS.

PEOPLE

Our team consists of almost half a thousand people from all over Europe. The experience of our long-time employees is complemented by a fresh look of these younger ones, thanks to which we realize creative ideas and implement innovative solutions together. And, together we create an energetic, efficient organization that values teamwork, mutual respect and continuous improvement.

Take care of the future

You can start saving water by changing your daily habits and by equipping your kitchen and bathroom with special fittings to reduce water consumption. Become eco-friendly today – the best way to take care of yourself and your loved ones tomorrow.

Ecology

the Ferro Way

Innovation and the promotion of eco-friendly solutions in bathroom furnishings has been our goal invariably for more than a dozen years. The long road and modification of these solutions has brought us to the forefront of manufacturers offering water-saving products. It is important to bear in mind the importance of choosing Verdeline products in terms of long-term use, reducing water and energy costs. On Ferro's dedicated Water Saving website, each user can calculate the amount of real savings based on their approximate water consumption and cost in their location.

New quality in saving

The Unified Water Label Association, based in Newcastle (UK), is an association whose main objective is to implement uniform water and energy labelling of sanitary products throughout Europe. The world's water resources are limited and water scarcity, with a growing population and climate change, is becoming a major global issue. This is why water consumption labels have been developed to raise awareness of which appliances use less water, so that we use water more efficiently. Ferro S.A. is a manufacturer focusing on ecological solutions and supporting the policy of saving natural resources. Selected VERDELINE products from our offer are labelled with WATER LABEL, thanks to which our customers know which of them use less water and energy, which additionally translates into reduced costs.

Chrome

Glossy chrome coating is a universal choice, fits perfectly any colour and style of arrangement.

Black-chrome

Chrome-broken black looks great in elegant bathing salons.

Black

Fashionable black underlines the friendly ambience of the bathroom interior, making it a unique place of care and relaxation.

White-chrome

This beautiful combination of bright colours brightens up the interior, which is very important especially in small bathrooms.

Old bronze

Durable coating, looks like old bronze.

Gold

Durable PVD coating in gold colour.

Gold-black

A combination of matt black and bright gold

NP80-BAQ13U Algeo Square rainfall shower system and bath mixer

Shower programmes

A modern shower, in addition to providing a comfortable bath, can also perfectly decorate the bathroom interior. That is why Ferro offers perfectly highly admired by users functional shower sets equipped with water-saving components and thermostatic mixers, as well as flush mounted sets with a mixer and a rain shower. Sets with elegant rain showers and shower handles of geometric or round form covered with shiny chrome coating look great in modern shower cabins.

ARE14 Retro toilet brush

Bathrooms accessories

Accessories are often called bathroom jewels as these small elements perfectly complement the whole interior. Made of high quality brass and transparent or matt glass, and covered with a glossy chrome coating, they wonderfully decorate the interior and facilitate everyday care.

Accessories and spare parts

Today's customer is demanding, attaches great importance not only to the appearance of mixers or shower sets. Various details, which are an important part of bathroom fittings, are also becoming important. Accessories such as traps, drain plugs or spouts should therefore not only be functional, robust, but also aesthetically finished. Often placed in a visible place, they provide comfort to the user and emphasize the beauty of the whole arrangement in its smallest detail.

ANGLE VALVES

Description

Angle valve with ceramic head and rosette

NEW

- ceramic head
- no contact of flowing water with paint finish
- nominal pressure: 1,0 MPa (10 bar)
- max. working temperature: 100°C
- finish: black matt

A	B	C [mm]	connection dimensions	Index
G1/2	G3/8	74,5	1/2"x3/8"	Z293-BL
G1/2	G1/2	74,5	1/2"x1/2"	Z294-BL

Angle valve with ceramic head and rosette

NEW

Available in Q1 2023

- ceramic head
- no contact of flowing water with paint finish
- the valve body doesn't scratch the rosette during installation
- nominal pressure: 1,0 MPa (10 bar)
- max. working temperature: 100°C
- finish: gold, PVD coating

Wall-mounted mixer taps

The collection of standing kitchen mixer taps is complemented by a large group of wall-mounted kitchen models. This solution is also appreciated by a large group of admirers. The possibility of selecting a product with a specific length of spout rotation is their main advantage.

Sinks

The collection includes granite and stainless steel sinks in various sizes and shapes, designed for individual users and for catering establishments. Granite sinks with a surface resembling the structure of stone are an interesting proposition for originally furnished interiors. Models made of stainless steel AISI 304 are distinguished by timeless design and fit into any arrangement. FERRO sinks are characteristic for their exceptional durability and resistance to external factors.

**Description**

chrome

BBB121S**Bora Sensor Power-Safe electronic wall-mounted mixer for cold or premixed water**

- power supply: 230V/9V transformer, 9V battery (emergency power supply)
- water inlet connection: 1 x 1/2" MT
- max. working pressure: 0.5 bar - 8.0 bar (7-116 PSI)
- flow rate: ~5.0 l/min (for dynamic pressure 3 bar)
- flow regulator: M18x1
- sensor range: adjustable from 40 - 170 mm
- long-lasting water flow protection: 90 s
- periodic flush function in case not used for more than 24 hours
- max. water temperature: 70°C
- recommended mixers: MM10 - 3/8" mechanical mixer
MT15B - 1/2" thermostatic mixer
- settings control: RC01 remote control

**Bora Sensor Power-Safe Pre-Mixed touchless wall-mounted basin mixer with external mixing valve**

chrome

BBB121SM

- power supply: 230V/9V transformer, 9V battery (emergency power supply)
- water inlet connection: 2 x 3/8" MT
- mixer: external, mechanical, flexible 3/8" x 1/2" hose
- max. working pressure: 0.5 bar - 8.0 bar (7-116 PSI)
- flow rate: ~5.0 l/min (for dynamic pressure 3 bar)
- flow regulator: M18x1
- sensor range: adjustable from 40 - 170 mm
- long-lasting water flow protection: 90 s
- periodic flush function in case not used for more than 24 hours
- max. water temperature: 70°C
- settings control: RC01 remote control

**Bora Sensor touchless liquid soap dispenser**

chrome

BBB122

- power supply: 230V/12V transformer
- soap container: 1 litre volume
- soap dosage: 1.4 cc/dose (different settings available)
- permissible soap viscosity: 100 - 3800 cPs
- sensor range: adjustable from 30 - 80 mm
- settings control: RC02 and RC01 remote control (detection range)
